If two drivers holding the same Preferred Number request that number for the same run group, the number will be assigned to the driver with the earliest request.

### **PADDOCK/PARKING INFORMATION:**

**PADDOCK RULES:** Paddock speed limit is 10 mph. Drivers, when going to grid, tech and returning to their paddock please use caution. Caution must be used at all intersections. Remember, there are others using the same roadways. Anyone operating any motorized vehicle on the track property must have a valid driver's license (any state) and present it to any official upon request. **Hover boards, skates, Razors, scooters, and skateboards (with or w/o motor) are banned.** Unlicensed motor scooters, motorcycles, ATVs, etc., cannot leave the paddock except to go to the grid, tech or showers. Golf carts drivers must have a driver's license. Parents are responsible for CLOSELY supervising their children.

**FUEL SPILLAGE:** On any paved area of the facility is forbidden and may result in a black flag and liability for repairs if instructions from any officials are not obeyed promptly.

Version 23 – May 10, 2024

**DAMAGES:** Any participant causing damage to OVR equipment or the Mid-Ohio facilities, intentionally or by accident or gross negligence as determined solely by the event officials after investigation, maybe financially liable for the resulting replacement or repair.

**JACK STAND BASES:** Must be supported to prevent pavement indentation.

**UNMUFFLED ENGINES:** May not be operated between 7 PM and 7 AM unless traveling to or from Tech on any evening.

**TIMING & SCORING:** All cars are required to use fully operational MyLaps (formerly AMB) transponders, and **the driver is responsible for providing correct information to Timing & Scoring.** Make sure your transponder is on and functioning for ALL SESSIONS. Information gathered from data collection systems and/or personal timing systems is unofficial and will not be used by race officials. **Cars without working transponders will not receive times.** The location of the test loop is the tech inspection area and it will be staffed the same hours as the scales. Efforts will be made to broadcast sector times during all sessions.

**START, FINISH and TIMES:** All races will start from the back stretch start stand (located at flag station 3). All restarts will be from the front straight start stand. All race timing will begin and end at the timing loop in front of Timing & Scoring. The loop is marked by orange cones on each side of the track and is 120 feet before the Mid-Ohio checker pattern on the track. For qualifying the session clock will start when the first car crosses the pit lane timing line. **For all races, timing will start when the front row crosses the front straight timing line after the pace lap.** The clock will continue to run during all flag conditions. On the Pace lap, the Pace car will pace the field to the Pit Lane entrance, then exit the track surface at the Pit Lane entrance. Be prepared for this to happen. Front row will then pace the field until the green flag is given.

**FLAGTRONICS (All classes except SMX):** For the 2024 Hoosier SCCA Super Tour, the Flagtronics electronic flag system is being offered as an option for drivers to voluntarily enhance their situational awareness. The Flagtronics system will be used to transmit flag conditions to in-car units and to communicate driver safety alert information back and forth with race control. Participants are encouraged, but not required, to utilize a Flagtronics FT200 in-car system. In-car systems are available for purchase from [www.flagtronics.com](http://www.flagtronics.com). The actual flags displayed at the stations take precedence over the Flagtronics dash display. Flagtronics information shall not be used as a basis for rules enforcement, however, a driver may provide such data in their defense in a protest or steward's action. If you plan to utilize a Flagtronics FT200 in-car, please provide your FT200 Serial # during your event registration in your MotorsportReg Vehicle Garage.

**FLAGTRONICS (SMX only):** For this event, the Flagtronics electronic flag system is required for all SMX entries to enhance driver situational awareness. The Flagtronics system will be used to transmit flag conditions to in-car units and to communicate driver safety alert information back and forth with race control. In-car systems are available for purchase from [www.flagtronics.com](http://www.flagtronics.com). For the avoidance of confusion between Flagtronics and actual (cloth) flags displayed at the stations, the more restrictive flag condition shall take precedence (e.g., Flagtronics shows green, but corner displays yellow flag – the condition for that part of the track should be considered yellow). To maximize green-flag track time, race control may utilize a Virtual Safety Car (VSC) full course condition during practice, qualifying or races for SMX. The VSC procedure is designed to freeze and slow the field to a prescribed maximum speed to allow for expedited course clearing. The VSC condition follows the DOUBLE YELLOW condition rules related to passing. However, unlike a Full Course Caution condition, the field will not bunch up and the gaps between cars will remain consistent. For this event, the VSC condition procedure will be as follows:

1. Race Control will issue a VSC command to all corner stations via the flag net and to vehicles via Flagtronics.
2. Corners will display the flag or sign indicating VSC, and Flagtronics in-car units will display a purple condition, with instructions guiding the driver to slow to the prescribed speed (35 mph). During VSC, the Flagtronics in-car unit will display the following, based on the vehicle's GPS speed.

35 Mph or less

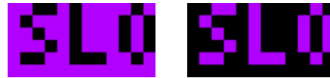

(Static)

36 to 39 Mph

(2Hz Flash Rate)

40 Mph or over

(4Hz Flash Rate)

**Note:** “35” is not the vehicle’s current speed, but rather the target speed. The alternating “SLO” is information for the driver to slow their car. Alternating “35 (black)/SLO (purple) indicates that a driver is within 4 mph of the 35 mph target. Alternating SLO (black)/SLO (purple) letters indicate a speed greater than 40 mph.

3. Drivers will have six (6) seconds to safely slow their vehicle to 35 mph or less.
4. Drivers are to maintain 35 mph throughout the VSC condition. Vehicles violating the speed limit will automatically notify race control through Flagtronics and be subject to penalty.
5. Once the course is clear, Race Control will instruct all corner stations to remove their VSC signs, and Flagtronics will change from PURPLE to GREEN, signifying the resumption of racing.

Because Flagtronics is required for SMX at this event, information and data may be used as a basis for rules enforcement for all on track infractions, not just VSC violations. Please provide your FT200 Serial # during your event registration in your MotorsportReg Vehicle Garage.

**RACING SURFACE:** The Pit Out Lane (drivers left of the curbing and/or colored line) is not part of the racing surface. Any driver who uses it as a racing surface by putting two or more wheels to the left of the curbing/line, whether in qualifying or the race, may be subject to a penalty from the the Race Director or Chief Steward. A driver who forces an overtaking car or a car being overtaken into the Pit Out Lane while a pass is being attempted may also be subject to a penalty for violation of GCR 6.11.1.B, failure to provide racing room on the marked racing surface.

**PIT LANE:** No crew member is allowed at the pit wall until after the start of the race. No sitting, standing, or leaning on pit wall.

**COURSE:** The Club Course will be used all weekend; 2.4-mile road course. Track Limit: 65 cars.

**BLACK & MEATBALL FLAGS:** The Black Flag and Meatball Flag may be displayed at the Starters Stand at Start/Finish and turn 11 on the left before the Carousel turn and the Pit entrance. The driver must go to the (SOC) Black Flag reporting area in pit lane (across from the start/finish stand).

**SOUND CONTROL:** Sound control will be enforced for this event. The sound meter is located just past the exit of turn 2 on the left. Participants **must** comply with the sound limit specified in the GCR (**103 dB**). Cars exceeding 103 dB in a session will be shown the closed black flag and the sound board for their first two readings. If a third reading greater than 103 dB is recorded in that session, the car will be black flagged, and the driver must report to Black Flag (SOC). The car may not return to the track until corrective steps have been taken per the GCR. Sound readings will be posted at the base of the tower.

**HARDSHIP LAPS:** Hardship laps will be available for a limited number of cars between sessions, time and schedule permitting. A hardship lap is defined as a single lap from pit out to pit in. To request a hardship lap, please see the Stewards of the Course (SOC) at Black Flag location, (base of tower).

Version 23 – May 10, 2024

**AWARDS:** Trophies for all races will be awarded in accordance with the GCR. Trophies will be presented at the event. SCCA U.S. Majors Tour and Hoosier Racing Tire SCCA Super Tour points will be awarded in accordance with the GCR and these Supplemental Regulations. Award Ceremony's will be held at the Tech Garage.

**VICTORY LAPS:** Winners of all races will receive a checkered flag. For Sunday races only, following the cool down lap, the winner of each class should proceed immediately to pit central where they will receive a checkered flag and proceed on course for a single Victory Lap, weather and schedule permitting. Drivers need not wear their helmet or gloves during the victory lap (GCR Appendix B.1.4.1), unless required by the venue. Passengers are permitted in accordance with GCR 6.11.7. Drivers shall maintain a safe speed and be wary of safety vehicles that may be on course.

## **CAR SAFETY and TECH INSPECTION:**

**DECALS:** A Hoosier SCCA Super Tour decal must be displayed on both sides of all competition vehicles. The U.S. Majors Tour decal is no longer required. Competition vehicles must also display the official SCCA Road Racing decal per GCR section 9.3.28.C. Stickers will be provided free of charge and may be obtained at registration and/or tech. (The official SCCA Summit Racing Equipment Road Racing decal does not serve as the Summit Racing Equipment contingency program decal).

**DATA ACQUISITION:** Hoosier SCCA Super Tour staff and their delegates may install data acquisition equipment in a competitor's car and/or direct the car to the chassis dynamometer onsite for any session. This program is to assist the CRB in performance balancing. If selected, participation is not optional and is not protestable. The data collected will not be used for compliance purposes. All cars carrying an SCCA data collection device must report to impound and be weighed immediately after their session. Failure to do so may result in penalties.

**SCALES:** Available at Tech: Thursday Night 6:30 PM-8:30 PM, Friday 7:30 AM-4:00 PM, Saturday 7:30 AM-11:30 AM and Sunday 7:30 AM-9:00 AM. Scales may be made available at other times at the discretion of the Chief of Tech.

**TECH:** All drivers without a 2024 helmet sticker (Bright Green) must present all driver gear as required by the GCR, vehicle logbook (PAPER COPY), and completed tech card to get their event tech sticker. **Helmet sticker will not be given out at express tech.** If your car requires an annual tech, you must also bring the car to Tech. Tech is located at the rear (South side) of the Maintenance Building.

**EXPRESS TECH (THURSDAY EVENING ONLY):** Drivers with both a current annual tech and a 2024 helmet sticker (Bright Green) can go to express tech to receive their tech card. Drivers needing a 2024 helmet sticker (Bright Green) will need to go to tech to get all their gear checked to receive a 2024 helmet sticker (Bright Green). If you need to get your gear checked and/or annual tech, please contact the Chief of Tech - Suzy "Z" Hardesty [techchief@ovr-scca.org](mailto:techchief@ovr-scca.org) to arrange for a time. Express Tech is a special window or table at Registration.

**SPEC MIATA & SMX COMPLIANCE:** At post-race inspection, Spec Miata and SMX participants may be instructed by the designated Class Compliance Chief (CCC) to remove parts, including but not limited to the cylinder head, for disassembly and/or inspection. Competitors are responsible for performing required disassembly and/or reassembly of their car, as well as any resulting expenses incurred. The CCC will report any findings of noncompliance to the Race Director, who will then determine the need for a Chief Steward's Action (CSA) or Request for Action (RFA).

**SMX TIRE MARKING:** Cars in SMX are limited to running 1 (one) new (sticker) set of class specified Toyo tires (Toyo RR P235/40/ZR17) per regular season Hoosier Super Tour event weekend during qualifying and races (not including any test day sessions). A mandatory impound for all SMX competitors is required after the

Version 23 – May 10, 2024

first dry qualifying or race (if rain in qualifying) session. It is the competitor's responsibility to ensure their tires are marked prior to going on track for the next session. Before the first dry qualifying or race (if rain in qualifying) session competitors will mount four Toyo RR P235/40/ZR17 tires for marking to use during the entire weekend. Class specified rain tires will not be marked. If a competitor damages a tire or wheel, and there is a safety concern, the competitor must find the Hoosier Super Tour Series Tech Chief or SMX CCC, if assigned, for inspection. At the direction of the Hoosier Super Tour Series Tech Chief or SMX CCC, the competitor will be allowed to substitute alternate used tire(s) to replace the damaged tire(s). New tires are not an option as a replacement tire for a damaged tire.

### **QUALIFYING/RACE**

**GRID:** Starting positions for the first sanctioned, official on-track session will be grouped by class in order by fastest recorded track record, next fastest track record, and so forth, and then by each driver's post mark/timestamp of their Entry form.

**NOTE:** Drivers not present at the grid when released for a race will be held at pit out and assume a position at the end of the pack. When released from pit lane during the pace lap, drivers may not assume their original grid position during the pace lap.

**FOR 3-DAY EVENTS:** Qualifying will be gridded based on fastest lap in the official practice session. Starting positions for the Saturday race will be determined by the fastest time recorded for each car from the preceding qualifying session. Starting positions for the Sunday race will be determined by the fastest time recorded for each car during the preceding qualifying session or the fastest lap during the Saturday race.

**QUALIFYING:** A driver not qualifying within a maximum of 115% of the recognized track record of their class must obtain permission from the Race Director to race. In the case of unusual circumstances, the Race Director can waive this rule for the entire event.
