 - b. Race session clock starts when the first car crosses the Start/Finish control line after the scheduled pace lap.
2. All races will start from the back stretch start stand (located at Flag Station 3). All restarts will be from the front straight start stand. All races will end with a checkered flag at the front straight starters stand.

4. Actual session start times may be delayed from the published schedule due to unforeseen circumstances during the event. It is the driver's responsibility to listen to the PA system and pay attention to activity on track.

B. RUN GROUPS: The schedule or run groups may only be changed (or start times advanced) at the discretion of the Race Director, with concurrence by the Event Chair, depending on pre-race entry counts or as needed to accommodate situations during the event.

C. **DRIVERS' MEETING:**

1. A mandatory Drivers' Meeting will be held for each run group immediately following that group's first Qualifying session in Impound at the Tech garage. Drivers exiting the circuit prior to the end of session must attend the meeting.

VII. GRID PROCEDURE

A. QUAL 1: Starting positions will be grouped by class in order by fastest recorded track record and then by each driver's post mark/timestamp of their Entry form.

B. QUAL 2: Starting positions for Qual 2 will be determined by the fastest time recorded for each car in Qual 1.

C. RACE 1: Starting positions for Race 1 will be determined by the fastest time recorded for each car from the preceding qualifying session(s).

D. RACE 2: Starting positions for Race 2 race will be determined by the fastest time recorded for each car during either qualifying session or the fastest lap during Race 1.

VIII. QUALIFYING & RACES

A. QUALIFYING PROCEDURES:

1. For all qualifying sessions, the Clerk of the Course may elect to have all stations display Double Yellow flags on the out-lap. These stations will drop the flag once the first car passes the Start/Finish line unless there is an incident requiring such flag condition.
2. Cars going considerably slower and/or holding up other cars may be subject to penalty. Weaving, scrubbing tires and/or impeding the progress of other drivers under green flag conditions is considered blocking and is subject to penalty. As a practical matter, this means that any car involved in a slow train utilizing the racing line is liable for impeding a faster car, even if actual impeding occurs elsewhere in the train.

B. 115% RULE: A driver not qualifying within a maximum of 115% of the recognized track record of their class must obtain permission from the Race Director to race. In the case of unusual circumstances, the Race Director can waive this rule for the entire event. A driver who is unable to maintain a safe pace during the race may be black flagged. Records listed are current as of Feb 28, 2026.

- F. FLAGTRONICS:** The Flagtronics system will be in use and required for HST series operations at Mid-Ohio. Flagtronics is a component system for drivers to enhance their situational awareness. The Flagtronics system will be used to transmit flag conditions to in-car units and to communicate driver

safety alert information back and forth with race control. Participants are required to utilize the Flagtronics system for this event.

1. Flagtronics is used as an advisory for local conditions (for example - debris, local yellow, slow moving vehicle), however during Full Course condition situations drivers will adhere to the more restrictive flag condition (for example - Flagtronics shows FCY, Corner Flag station is green: Flagtronics/FCY takes precedence) (for example - Flagtronics shows yellow, Corner Flag station shows red: Corner Flag/red takes precedence).
2. Flagtronics information can be used as a basis for rules enforcement, and a driver may provide such data in their defense in a protest or steward's action. It is highly recommended that the Flagtronics unit be located within the in-car camera view.
3. Flag condition for Race Starts: When approaching a start, the pace car will turn off its lights at Turn 1, all stations will lower their double-yellow flags, and Flagtronics will change from full course yellow to a blank state. This signifies to the field that it is preparing to start. In split-start races, the double yellow flags and blank state change will occur when the first pace car reaches Turn 1.
4. Flag condition for Restarts: When approaching a restart, the safety car will turn off its lights at Turn 11, all stations will lower their double-yellow flags, and Flagtronics will change from full course yellow to a blank state. This signifies to the field that it is preparing to restart.
